Case One conference '24

The project idea is project planner or project manager which we can organize team tasks and the leader assign tasks with specific duration or deadline and know the priority and status of each task is it completed or to do or in progress etc... "the project is only one interface"

REQUIREMENTS:

1. Forget password
2. Search bar
3. Filter
4. Authorization
5. Subscription plan
6. Registration by OTP

A task contains the following:

1. Landing page or introduction page
2. Task description
3. A Status (To Do, In Progress, Testing, Done)
4. Priority (very high, high, moderate, low, Very low)
5. Category (Bug, Task, improvement)
6. Label (type of task)
7. Deadline
8. Reporter (the one who created the task)
9. Assignee (the one assigned the task / the one working on it)

Important notes ::

- Try to make it easy with better user experience as much as you can.
- All pages should be totally responsive.
- Make sure that your code is clean and organized
- !! Don't forget to use Html comments !!

FLOW with more explanation

● Team Leader **Must** join a **subscription plan** which is based on team number
e.g. Plan A >> [1-5] - For 50$
    Plan B>> [6-10] - For 80$
    Plan C >> [11-15+] - For 100$
    Free   >> For team members
(THIS IS ONLY AN EXAMPLE)

● A Team Leader then Creates a **Project**, and once a project is created he can add his team members without the need for them to pay or join any subscription Plans.
A team leader can add new members Mid-project (if it doesn't exceed his subscription plan)
There are NO Maximum Projects allowed
Only a Team Leader (who paid the subscription) can create a Project

● A Project Contains **Sprints** (basically a timeframe where we put tasks)
   Any Member create a Sprint as long as they are on the project

● Then a **Task** is created inside any sprint You want inside the project,
● Anyone can create themselves a task or create a task and assign it to someone else
(example: Mava can create tasks for Gannah to finish)

When a task is done member can click complete and its status is changed automatically to done
Any member can add comments on anyone's tasks
